

AMANUEL MUSA

FULL STACK WEB DEVELOPER

Addis Ababa, Ethiopia | +251 940 100 601 | amanuelmusa11@gmail.com | linkedin.com/in/amanuel-musa | github.com/vamous-am

PROFESSIONAL SUMMARY

Electrical and Computer Engineering student and full-stack developer with hands-on experience designing and deploying relational and NoSQL data systems end to end, from schema design through production, across web and mobile. Strong foundation in Java alongside applied experience in Go, Node.js/Express, and Flutter, with a track record of picking up unfamiliar frameworks and tooling quickly, including owning an auth/RBAC foundation on a multi-tenant platform. Background also spans embedded systems and circuit design (C/C++, MATLAB, Proteus), giving a broader engineering foundation beyond application-level software.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Go, Java, SQL, Python, Dart, HTML5, CSS3

Backend & APIs: Node.js/Express.js, Go (Fiber, GORM), RESTful API design, JWT auth, rate limiting, Zod schema validation

Databases & ORMs: PostgreSQL, MySQL, MongoDB, GORM, Sequelize

Frameworks & Libraries: React, Next.js, Flutter (Riverpod), Tailwind CSS, Bootstrap, pandas, NumPy, Matplotlib, Seaborn

Embedded Systems & Hardware: C/C++, Microcontrollers, Proteus, Logisim, MATLAB, Altium

Tools & Platforms: Git/GitHub, Docker, AWS (S3, EC2), Vercel, Render, Aiven, MongoDB Atlas, Postman, Socket.io

PROFESSIONAL EXPERIENCE

Future Interns - Full Stack Web Development Track

June 2026 – August 2026

- Building a Mini CRM (client/lead management system) as the program's second major deliverable, using a TypeScript monorepo with a React/Vite frontend, a Node/Express backend, and shared Zod validation schemas.

Software Development Bootcamp - Information Network Security Administration (INSA)

July 2026 – August 2026

Selected for a competitive one-month software development bootcamp at Ethiopia's national information and network security agency, delivering two full-stack builds during the program.

Habeshan REMS - Offline-First Remote Employee Management Platform

- Owned the Auth, Users, Organizations, Teams & Admin slice end-to-end (schema through frontend) on a 4-developer team building a multi-tenant, offline-first workforce platform (Go/Fiber, PostgreSQL/GORM, React/TypeScript, Dexie.js); designed the multi-tenant schema and caught a users-table uniqueness/soft-delete conflict before implementation.
- Shipped password-reset, soft-delete, and full Admin/Team CRUD across backend and frontend, plus the Login, Register, and Admin Management screens.

StoreFront App - Flutter E-Commerce Application

- Built a Flutter e-commerce app end-to-end against the FakeStore API using flutter_riverpod for state management, covering authentication, product browsing, and cart management.

PROJECTS

SaporiVivi — Full-Stack Food Delivery Platform

March 2026 – May 2026

- Designed a 16-table relational schema and built the backend in Node/Express (deployed on Render) with MySQL/Sequelize (Aiven), and the frontend in React/Vite (Vercel), with Cloudinary uploads, Pino logging, and Zod validation.
- Implemented row-level locking and atomic transaction rollback on the order-processing flow to prevent race conditions and partial writes under concurrent orders, keeping order and inventory state consistent on failure.
- Built and validated RESTful API endpoints for real-time order processing, using Postman to test payloads and edge cases before deployment.

Personal Portfolio Website

May 2026

- Built with Next.js (App Router), TypeScript, Tailwind CSS, and Framer Motion, achieving strong Lighthouse scores; diagnosed and fixed an LCP issue traced to a Framer Motion stagger animation.

Retail Sales Analysis - Data Visualization

- Cleaned and analyzed 9,800 retail orders (2015–2018) with Python (pandas, NumPy, Matplotlib, Seaborn), identifying Q4 seasonality and regional revenue gaps.

EDUCATION

Bachelor of Science in Electrical and Computer Engineering

Jan 2022 – Present

Addis Ababa University | College of Technology and Built Environment

- Relevant coursework: OOP with Java, Data Structures & Algorithms, Database Systems, Software Engineering & Project Management, Data Communication & Computer Networks, Computer Network Security

CERTIFICATIONS

- GitHub Foundations - DataCamp skill track
- AI Fundamentals - DataCamp certification

ACHIEVEMENTS & ADDITIONAL INFORMATION

- Competitor, Information Network Security Administration (INSA) Programming Competition
- Team Leader, collaborative gaming project
- Languages:** Amharic (Native), English (Professional)
